

CLERGYMAN'S DAUGHTER FREE; SEEK MARPER CHURCH WORKER

PAIR FILED HOMES IN MAINE

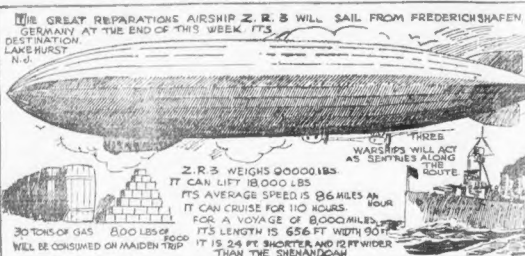

Continued from First Page

The Brindley school teacher was sworn to by the state, after the Rev. A. B. McAllister, formerly stationed at Portland, N. H., for the past year pastor of the Methodist Church.

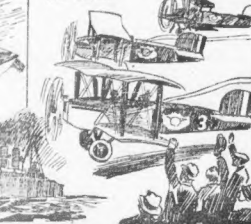

The girl was arrested at the apartment of Brown's sister, Mrs. Francis Lawrence of No. 3 Albion street, South Bay. No trace of Brown was found.

The girl is said to have been about a week ago. She made a confession that she had been in a rooming house, where she had been with the woman who had been in the rooming house for some time. The woman, who had been in the rooming house for some time, had been in the rooming house for some time.

SWORE NOT TO POISON EACH OTHER

Man Who Killed in Order to Wed Widow Reveals Pre-Nuptial Pact

MAINE, Sept. 29.—(U.S.N.A.)—A pre-nuptial "poisoning pact" by which it was mutually agreed that if one ever tried to poison the other would be revealed to a judge of probate by the other was revealed today by Robert Tate, in jail here, charged with the slaying of John Harrington in a "love pact" murder with Harrington's wife, Ruby.

Tate, following his confession, was asked whether he was not afraid to marry the widow who had once intended to poison him. "I would never do anything like that again," he replied.

A Library on Asphalt Pavements

TO HELP YOU IN WORKING OUT YOUR PAVING PROBLEMS, we have prepared and published over seventy-five distinct treatises, handbooks, specifications and discussions covering accurately and clearly the economics of pavement selection; methods of construction and maintenance, essential tests and inspection and the service experience of cities, states and counties. Tell us what information you seek and we will gladly send to you without charge the appropriate literature for your asphalt library.

ASPHALT BASE PAVEMENTS ("Black Base")

THE USE OF "BLACK BASE" IS SPREADING RAPIDLY throughout the United States and Canada. Black base pavements have increased more than 800 per cent in area in the Pacific States during the past six years and are now being laid in many Eastern states, counties and municipalities. If the asphalt base pavement is not in service in your locality try it on the next paving job and learn at first hand its many advantages. Write for specifications and complete information.

"A CAT HAS NINE LIVES"
BUT GRANITE LIVES FOREVER

HURRAH! STATIC IS EATING AS COLD WEATHER ARRIVES

By THE RADIO EDITOR

"It's radio time again." How true! How true!

The leaves are turning color, the birds are going South, the furnaces are becoming hot, and the overcoat is in vogue, but—what cares the radio hater?

Not a good start for him. He is in his glory, for all these signs are indications that static is also leaving us. It is going down South too.

"It's a queer thing but he just won't stay where the cold weather is."

The end of that Man static, to the fan means distance, and programs are mixed with crashing noise.

To the radio dealer, it means dollars and cents. But buyers, etc. For this is going to be the biggest radio year ever. Business already is being stimulated by the improved receiving conditions.

Our local stations have promised to send programs for the coming season. Well, competition will be keen, even more so with a 500 watt station coming on in Worcester.

Now, about tonight, co-operation is what puts the "go" in everything, so let us have it among all the listeners in on WEEI. Without it, the 500 watt power tonight will send the stream collapse on its own day.

Don't—now this means you—don't allow your set to oscillate. If you do, the fellow next door or your neighbor in the next block will be cutting you all the time that aren't in the dictionary. Of course, if you don't know you are the hobnobber "idiot" that can't let a fellow enjoy a good program, but never, never—DON'T DO IT.

When your set begins to oscillate and you can tell by the equalizer or the coupling in the capacitor or the volume of the set, the resistance as quickly as you can. You can't enjoy the program under these conditions, neither can anyone else—and don't let you tell you different. So let us all co-operate to make it a good time for all.

NEW COMPANY NOW UNDER WAY

A new company has been organized in the radio manufacturing field, which already has brought out two developments in radio engineering—the double transformer, and the Koudon-Kill.

While the company itself is new, its executives are well-known in the industry. The company was organized by Mr. Walter J. Henry, who is president and chairman of the board. Mr. Henry was formerly general manager of the Wireless Specialty Apparatus Company. Associated with Mr. Henry are two of his former associates, Mr. Watson, formerly production manager, and Mr. Rosen, formerly of the engineering department.

Mr. Henry's principal reason for starting the company was his desire to carry out certain manufacturing ideas of his own.

The first product may be a new kind of transformer, the Twin A, and the Koudon-Kill, which are designed to "kill" the oscillations in the set, and can be used in any kind of amplifier and with any make of amplifier tube. It is claimed that the Twin A will give greater volume and clearer reproduction than any transformer that has been brought out.

The Koudon-Kill eliminates all humwork in finding capacitors for all circuits, it makes the expert's job to determine in advance the exact capacity required for best results.

The Koudon-Kill contains ten accurately sized mica condensers, having a total capacity of 0.015 mfd. when used together, and adjustable in unit mfd. steps. By means of the flexible leads and slip provided, it is a simple matter to determine what capacity gives the best results.

The condensers can be permanently connected in any circuit, they are of low loss value, and are available in all forms of mounting. The ends of the condensers can be bent up to take standard terminal and lead.

Patented fixed condensers can be used with grid leaks to assist with intermediate and audio frequency transformers, as well as assisting condenser, telephone condenser, by mica condensers.

ON WEEI'S OPENING PROGRAM

Dok Eisenbourg and His Sinfonians

These fellows will go on the air from WEEI tonight at 11 o'clock as part of the opening program of the new 500-watt station.

MUSIC AND FURNITURE STORE ADDS RADIO DEPT.

Arthur Sargent & Co. in Adams Square, an established furniture store since 1864, has recently added a large radio department, which comes under the supervision of the musical department.

Radio is growing in a place of affairs, and the store has decided to add the radio department to its line of goods. The store has a large stock of radio sets and is ready to receive orders for the same.

ANOTHER 500 WATT STATION

Within two months there will be another high powered station come on the air. The new station will be operated by the call letters WCTE and will be equipped with a 500-watt transmitter.

It will be located at Clark Street in Worcester. The university has made an arrangement, large enough to guarantee the station an outlet in Dr. Goodrich.

Members of the Worcester radio club, which is under the supervision of Dr. Goodrich, will do most of the construction work and the greater part of the program will be provided by the Clark students and by the faculty.

New England Made Radio Cabinets Popular

An old established line of cabinets are becoming more popular every day are the R. E. Z. cabinets, made by the R. E. Z. cabinet company of Boston. Mr. Robinson started by making different grades, but now makes one first class grade in either mahogany or walnut. He says that the radio public wants nothing but the best of material and workmanship in cabinets.

At Last!

A Single Circuit Set That Does Not Bother Your Neighbors

The New Improved

JACOBS CONCERT RECEIVER

We are the originators and sole manufacturers of the genuine Jacobs Concert Receiver. The only place in Boston where you can get the genuine.

Two years ago the cheapest single tube set on the market was about \$15 and wasn't very efficient for getting distant stations. Manufacturers said it was impossible to build an efficient set at that price. We built and sold what at that time proved to be the most efficient set and at the unheard of price of \$15. We now announce another new departure in a single circuit set that is very selective and has reduced

addition to a minimum through the medium of our new 150 Bank Wound Coupler and new Low Loss Condenser. We have discontinued the use of the old coupler, which although efficient, needed considerable readjustment.

MORE SERVICE STATION SPACE

Cambridge has a radio service station at the Harry Koss Company, located at No. 212 Massachusetts Avenue.

The radio department has been equipped to meet the ever-growing demand. There is now a department equipped with the newest radio instruments and to do most of the repairing and building of sets. This department is in charge of a forward radio operator with a record of past experience. In the

At Last!

A Single Circuit Set That Does Not Bother Your Neighbors

The New Improved

JACOBS CONCERT RECEIVER

We are the originators and sole manufacturers of the genuine Jacobs Concert Receiver. The only place in Boston where you can get the genuine.

Two years ago the cheapest single tube set on the market was about \$15 and wasn't very efficient for getting distant stations. Manufacturers said it was impossible to build an efficient set at that price. We built and sold what at that time proved to be the most efficient set and at the unheard of price of \$15. We now announce another new departure in a single circuit set that is very selective and has reduced

addition to a minimum through the medium of our new 150 Bank Wound Coupler and new Low Loss Condenser. We have discontinued the use of the old coupler, which although efficient, needed considerable readjustment.

RADIO AMERICAN

Boston American Late News Flashes
From 10:30 a. m. until 7:30 p. m., up-to-the-minute news will be broadcast hourly during the Boston American news offices, through WNA.

THREE STORES NOW IN DEWEY CHAIN

Three stores are now in the chain operated by the Dewey Radio Company. Last year Richardson's radio department, which is part of the Richardson Brothers, branched out by opening another store on Stuart street. Now the Dewey company has again branched out by opening a new store at No. 182 Summer street.

BANK WOUND COUPLER USED IN NEW RECEIVER

Edward Jacobs of the Jacobs Radio Supply Company, has come forward with a new design. He announces a slide circuit set that is very selective and has reduced radiation to a minimum through the use of a new 125 degree bank wound coupler and a new lens condenser.

NEW SHADOW PANEL MOST ATTRACTIVE

A new panel beautiful in every way has recently been put into the market by the Columbia Rubber Company. This panel is known under the trade name of Shadow Black and gets its name from its shadow surface which gives it the shadow appearance. The panel, besides being attractive, has advantages in as much as it will not show dust, finger marks, grease or dirt. The Jacobs Radio Company has been known under this name only a few days, having formerly been known as the Triangle Rubber and Supply Company.

REGENERATION EXTENSIVELY USED

By N. M. CURTIS.
A person contemplating buying a radio set, is confronted with a number of problems. The majority of people, not being familiar with the technical details of radio, do not know whether they require a set of one, two, or even a half dozen tubes. The fact that there are several different types of tubes is again confusing. Perhaps it is a good idea to discuss the type of receiver which has made radio so popular—namely, the regenerative receiver.

MUSIC RIGHT THERE WITH 'EM ALL

Cleveland, O., Sept. 29.—To give the lie to the saying that "a prophet is without honor in his own country," WTAM, Cleveland's largest radio station, will broadcast a program of music by Cleveland composers. This will be on the night of October 1, from the studio of the William Graham.

WOMAN SETS CLOTHES AFIRE, DIES IN AGONY

Wife of Frank Mason, No. 22 South street, was fatally burned at her home. She went downstairs to see members of her family heard her scream. They found her in the back yard with her nightgown in flames. Dr. William B. Segur of Edfield, medical examiner said death was accidental.

INTERNATIONAL SHOWS HUB STEAMSHIP CRASH

With stirring effort and surprise, the Japanese have in the short space of a year built themselves practically two new cities and this is very well shown in the current issue of International News known as No. 80, which is being shown at the leading theaters here. There are some very vivid views of the disaster, the shipwreck of the liner, the winter supply of walrus meat in off Cape Serge, Siberia, as well as in interesting and thrilling views of the S. S. Edward Pierce, which was smashed by the freighter Maudslayi at Boston.

MOVIE RECEIPTS FOR DEAD PATROLMAN'S FAMILY

Arrangement was made today that Walter H. Snydel, manager of the Central Square Theatre, East Boston, would turn over his house on the afternoon of Columbus Day in the committee raising a fund for the widow and child of Patrolman Albert M. Moten.

All charge purchases during the balance of the month will be entered on the October bill rendered Nov. 1.

Jordan Marsh Company

VALUE—QUALITY—SERVICE—ASSORTMENTS

—Time to Change to Your New Fall Underwear

Now that Cool Fall Days are Here

Union Suits

Women's fine Cotton Union Suits for Fall and Winter wear. A perfect fitting garment in a variety of styles. 2.00

Extra Sizes at 2.25

WOMEN'S Fine Nain-sook Nightgowns in several very attractive styles trimmed with fine laces and ribbons. 1.95

NOVELTY Nightgowns made of figured Flannelette (cotton) trimmed with fancy stitching, shirring and ribbon bows. 1.95

Perhaps there are circuits which are more sensitive. Some require six and more tubes. Others get along on four or five and their owners seem pleased with them. The main reason for this is that the tubes are not so sensitive as the regenerative receiver.

The most common argument against the regenerative set is "the radiation." As a matter of fact, a regenerative set will radiate less than a vacuum tube set. The reason for this is that the antenna circuit is tuned to the station and there is no more coupling between the antenna and the antenna coil. A single circuit set, where the antenna forms part of the main tuning circuit, and where regeneration is employed, is undoubtedly the worst offender in radiating "signals." If, however, we arrange an efficient separation between the antenna and the tube itself, very little radiation can take place. This is possible through the use of inductive coupling.

Manufacturers have generally avoided the use of inductive antenna coupling, in order to handle a number of tuning circuits. A radio set, in fact, with the average person, must be able to handle a number of tuning circuits. This is the case with the "single circuit" set. With two circuits, it is possible to tune the antenna at the same time as your set. In fact, the antenna becomes part of the set. It is for this reason that when your detector tube "pulls over," it radiates into the antenna and causes an "inductive coupling" effect.

The U. S. Navy has used a tuned antenna with variable inductive coupling. The general arrangement is adaptable to a broadcast receiver and is extremely simple. This arrangement greatly minimizes the radiation of a single circuit set. The U. S. Navy has used regenerative receivers since before the war and still uses them.

The amateur wireless operator, through the use of a tuned antenna, has broken a record with low power, have almost universally adopted the regenerative circuit. The tuning link between MacMillan and the United States was through a regenerative receiver. The regenerative set has not been used to the extreme extent of its efficiency. We should not condemn regeneration because it is used in the single circuit set. Let us on the other hand investigate the possibilities of "superheterodyne" through the use of vacuum tubes in our regenerative sets, and this is the purpose of an efficient method of antenna coupling. This would result in the ultimate receiver for the average pocketbook, and the detector that we have taken a big step toward eliminating the "signal" evil.

AMERICAN MANUFACTURERS AHEAD OF FOREIGN
The simplicity of setting up modern radio sets is portrayed in a communication just received from a fan in Berlin, Germany, who, just before his return to his home in Berlin, purchased a Neutrodyne receiver at the factory. In the month of wrapping up the set, the instruction book was inadvertently left. Now comes a letter from Mr. Fleischer in which he says: "I had my trouble in getting the batteries fixed on mine. I finally got Schenker. After a few experiments, and for the rest of the voyage was able to tell in stations all over the United States, up to the time we were 1000 miles from New York. It shows how simple your American sets are in operation. You American manufacturers are way ahead."

TALBOT-LANDY RADIO CO., Inc.

The Murdock Neutrodyne
will end your search for the right receiver
Diagrams Stations can be tuned in with remarkable clearness and volume. All but the most distant can be heard on a loud speaker.
Local Stations can be tuned out readily, enabling you to choose the broadcast programs you want to hear at will—and without interference from other stations.
Easy to Operate. Any one can learn to operate this receiver with ease and skill. A station once located and the dial settings noted, that station can always be brought in again by returning to the same dial settings.
Dependable. This receiver is guaranteed to give the most satisfaction under all conditions where reception is possible.
Appearance. The handsome solid mahogany cabinet and pleasing design make it acceptable to music or living rooms.
Let your dealer demonstrate the Murdock Neutrodyne for you. He will arrange for installation.

SANDE INSISTS HE IS GOING TO RIDE AGAIN

By JOSEPH L. LANEY

Can a Baseball Be Hypnotic?

THE death of Frank Chance in Los Angeles revives a strange belief among some ball players. It occurs the way one of the old-time players of the Chicago Cubs, who was a member of the team when Chance was playing, told me that he had seen Chance hypnotized. He said that he had seen Chance in a hypnotic state, and that he had seen him in a state of extreme excitement, and that he had seen him in a state of extreme depression. He said that he had seen Chance in a state of extreme excitement, and that he had seen him in a state of extreme depression. He said that he had seen Chance in a state of extreme excitement, and that he had seen him in a state of extreme depression.

Milk

DRINK MORE MILK
FOR BETTER TEETH!

—Scientists agree that
green vegetables and
plenty of MILK are
indispensable in de-
veloping sound teeth.

Drink 4 glasses
of MILK a day.

3-MINUTE JOURNEYS

By Temple Manning

CHINA, with its air of mystery and its picturesque mountain peaks, is one of the most romantic countries in the Far East. The strange customs of the people, their method of living, their mode of travel and their style of dress, all are so different from those of the United States that it is almost impossible to imagine the life of the Chinese people. The foreign traveler has been in one corner of a day, and the other in the next. Further down, one comes across the great barrier, the Himalayas, and the life of the Chinese people is so different from that of the United States that it is almost impossible to imagine the life of the Chinese people.

HOW TO KEEP WELL

By Dr. F. X. Mahoney, Boston Health Commissioner.

It is a common mistake to think that the only way to keep well is to eat a diet of fruits and vegetables. While this is a good thing to do, it is not the only way. The body is a machine, and like any machine, it needs oil. The oil of the body is made up of fats, and these fats are found in the animal kingdom. The body also needs vitamins, which are found in the plant kingdom. The body also needs exercise, which is found in the animal kingdom. The body also needs rest, which is found in the animal kingdom.

495 FRESHMEN JEWS OBSERVE THIS YEAR AT THEIR NEW WELLESLEY

The freshman class of Wellesley numbered 495 this year, as against 412 last year. Of the number, 116 are from the New England States, 114 from the Middle Atlantic States, 41 from the South, 64 from the North Central States, 4 from the West, 1 from foreign countries, and 1 from a territory.

Of the 495 entered, 155 completed their preparation in high schools, 117 in private schools, 1 in normal schools or colleges, and 134 had part of their preparation in high and part in private schools.

The following students from New England are among those having the highest record in the entrance examination:

Barbara Allen, Brookline High School; Charlotte Bailey, B. M. C. Parson High School, Fall River; Barbara Chase, Holyoke High School; Margaret Dashi, Abbott Academy, Andover; Edna Gallagher, Newton High School; Louise Tower, New Haven High School; Joseph Haworth, Lincoln School, Providence, R. I.; Constance Trenchard, Abbott Academy, Andover.

SAD MOMENTS MARK COMEDIAN'S WORK

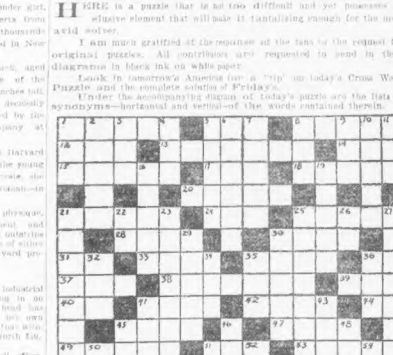

CHARLES RUGGLES. He has a miserable time while you laugh at him as the comedian prize fighter in "Mr. Battling Butler" at the Majestic.

COST OF CRIME WONDER GIRL IS DISCOVERED BY EXPERTS

Chicago, Sept. 29.—The cost of crime in the United States has reached its highest point, as much as the annual budget of the nation, which was more than three and one-half billion of dollars, according to a report prepared by the President's Committee on the American Bankers' Association.

The report, which was prepared by the President's Committee on the American Bankers' Association, states that the cost of crime in the United States has reached its highest point, as much as the annual budget of the nation, which was more than three and one-half billion of dollars, according to a report prepared by the President's Committee on the American Bankers' Association.

CROSS WORD PUZZLE

TYPEWRITER OF BLIND INVENTOR BRINGS \$13

East Hampton, N. Y., Sept. 29.—The typewriter used by the late Jed Wood Smith, blind inventor of the Braille method of reading for the blind, was sold at auction for \$13, the purchase being a former housekeeper, Miss Stella Payne, who says she bought it through advancing years, as follows:

Smith used his little invention to the Perkins Institution at Watertown and that institution bought the piano case which Smith used for thirty years.

MECCA IS REPORTED AS CAPTURED BY TRIBESMEN

London, Sept. 29.—While the 25-man crew was last week captured by the Meccans, the Meccans are reported as having captured the ship.

93 SERGEANTS TAKE LIQUENTUARY EXAMS

Washington, Sept. 29.—The 93 sergeants of the United States Army took the Liquentuary Exam today.

TRAINMEN'S LEADER TO OPPOSE GLASS

Washington, Sept. 29.—The Trainmen's Union today announced that it would oppose the Glass-Steagall bill.

ULSTER BOUNDARY SETTLEMENT IN SIGHT

London, Sept. 29.—(A.P.)—The time approaches for Parliament to make a decision on the Ulster Boundary Bill.

MORE BUTTER STORED THAN EVER BEFORE

The largest amount of butter in the world is now stored in the United States.

WIN GENESE

The Genese won the 1934 championship.

SUITS, APARTMENTS
and all other real estate can profitably be sold by experienced agents in these columns.

YOU WILL BE SUITED

in everything you buy, if you purchase what you need through the ads on this page. To sell everything, call Ad-Taker, Liberty 4000.

"WONDERFUL RESULTS"

Boston American has been using your page for the past 8 years, and have received wonderful results.

NOLAN REAL ESTATE CO.

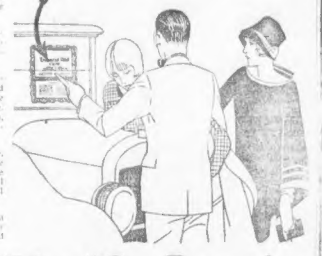

"Inspected" Used Car Bargains

Every used car advertised on this page has undergone a rigid inspection. The Boston American employs expert mechanics to make these tests.

Look on the Windshield for Certificate

Only an "INSPECTED" car can receive the blue certificate of inspection. It is your protection and safeguard.

If you do not see the blue Certificate of Inspection on the windshield of the car you want to buy, ask the dealer to have an inspection made by the Boston American.

The Boston American will help you select a Used Car Bargain. Write for free pamphlet explaining the best plan in detail.
